re FRAME-UP: As you probably know, numbers of p. 506 should be 508, 507 should be 509, etc. You refer, in P-M, to Frazier's statement as being on p. 506 (which it is, just to mark but not on the page number-ed 506! Please see top of page 432 in the post-mortem.

re POST-MORTEM:

page 385, last complete paragraph: Should talking be walking?

page 407, should not the extreme bottom read *Pp. 475-487?

page 459, at top, should not the dimension $1\frac{3}{4}$" be $\frac{3}{4}$"? This would correspond better with a flight path originating from East of the curb rather than from directly overhead. The "1" is, I believe, a dimension line. The other dimension line is of course to the right of the $\frac{3}{4}$" dimension.

Dear Mr Weisberg,

You may already be aware of the above observations. Possibly they may be of some use.

"Illegitimate non carborundum!"
as 'Illegar Joe' used to say.

Best regards,

James Starr Jr.
